

Event Report

N.S. S. event on Water Conservation

Theme	Water Conservation through Continuous Contour Trenches (CCT)
Date	12 th March 2022
Sponsored by	Development Support Center and Gram Panchayat Mothe Kadwan.
Purpose	Purpose: Reduce surface water flow velocity, promote infiltration, and prevent pollutants from draining into water bodies (suspended sediments, nitrogen, phosphorous). Development Support Centre aims to provide knowledge based support to institutions involved in promoting sustainable livelihood and participatory natural resource management.
Objective	<p>The main objectives of trenching are to obstruct the flow of water and store it.</p> <p>To awaken and use the man power of villagers of the NSS adopted village into sustainable water conservation programme.</p> <p>To make a team of dedicated peers for common goal for the welfare of village.</p>
Organized by	The N.S. S. volunteers and the coordinator of Development Support Center, Visarwadi.
Beneficiaries	Agriculture land below the CCT and farmers around.
Highlights	All these trenches are dug on a contour. The selection of trenches depends on the site characteristics and rainfall intensity. The site was that of Panchayat hence selected by Hon'ble Sarpanch. The N. S. S. volunteers made Shramdan in form of Continuous Contour Trenches using mattock and spade. Almost
Outcome	The pulse polio initiative took place with an objective of achieving one hundred percent coverage. Two drops of life to every child up to five years of age mission has brought polio virus down. The present drive has created high impact on the community where parents willingly take their child to the center for polio oral vaccine.
